Centering community values in tree planting and heat-related health interventions: conversations with community leaders

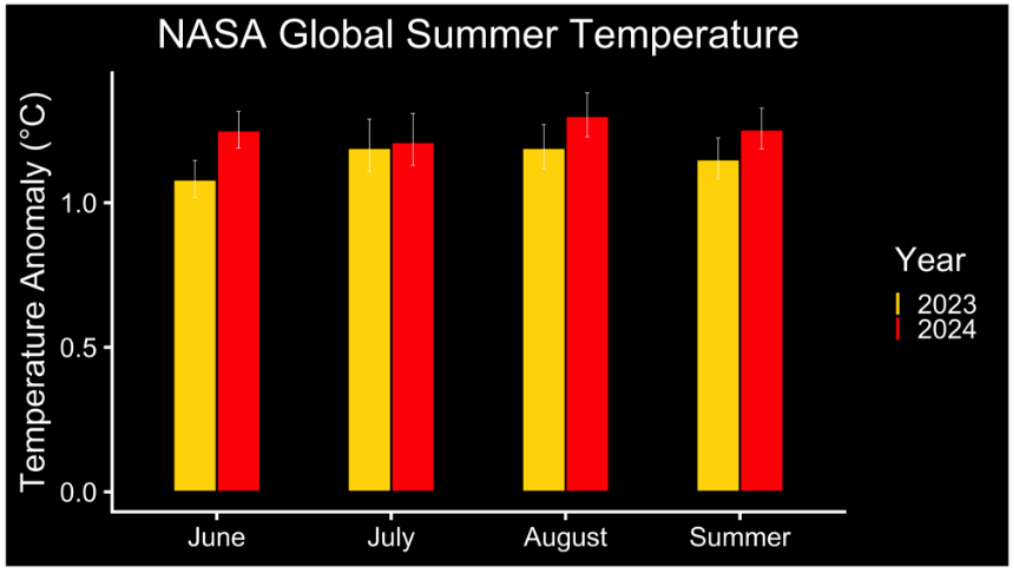

Olivia Keenan, Aalayna Rae Green, Alexander Young, Daniel Katz, David Miller, Qi Li, Wenna Xi, Fiona Lo, Arnab K. Ghosh

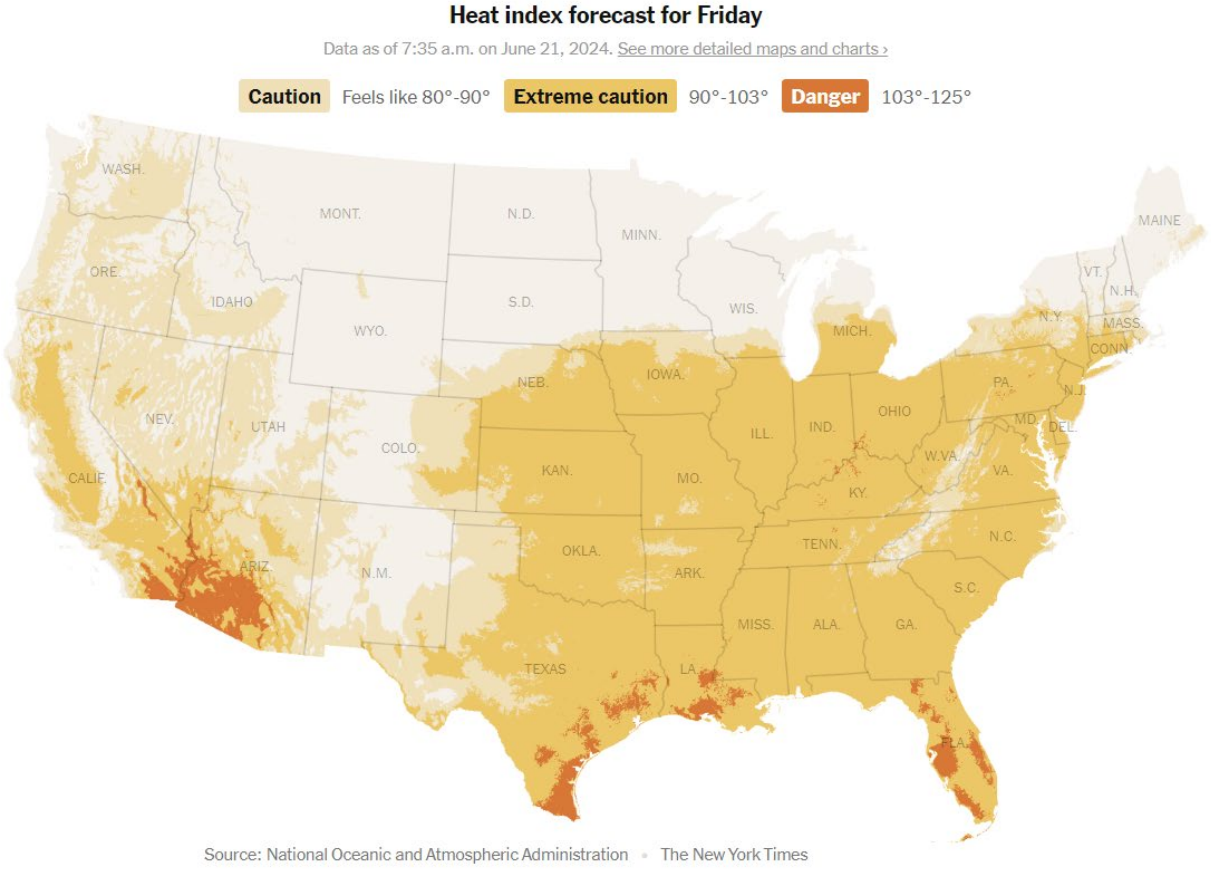

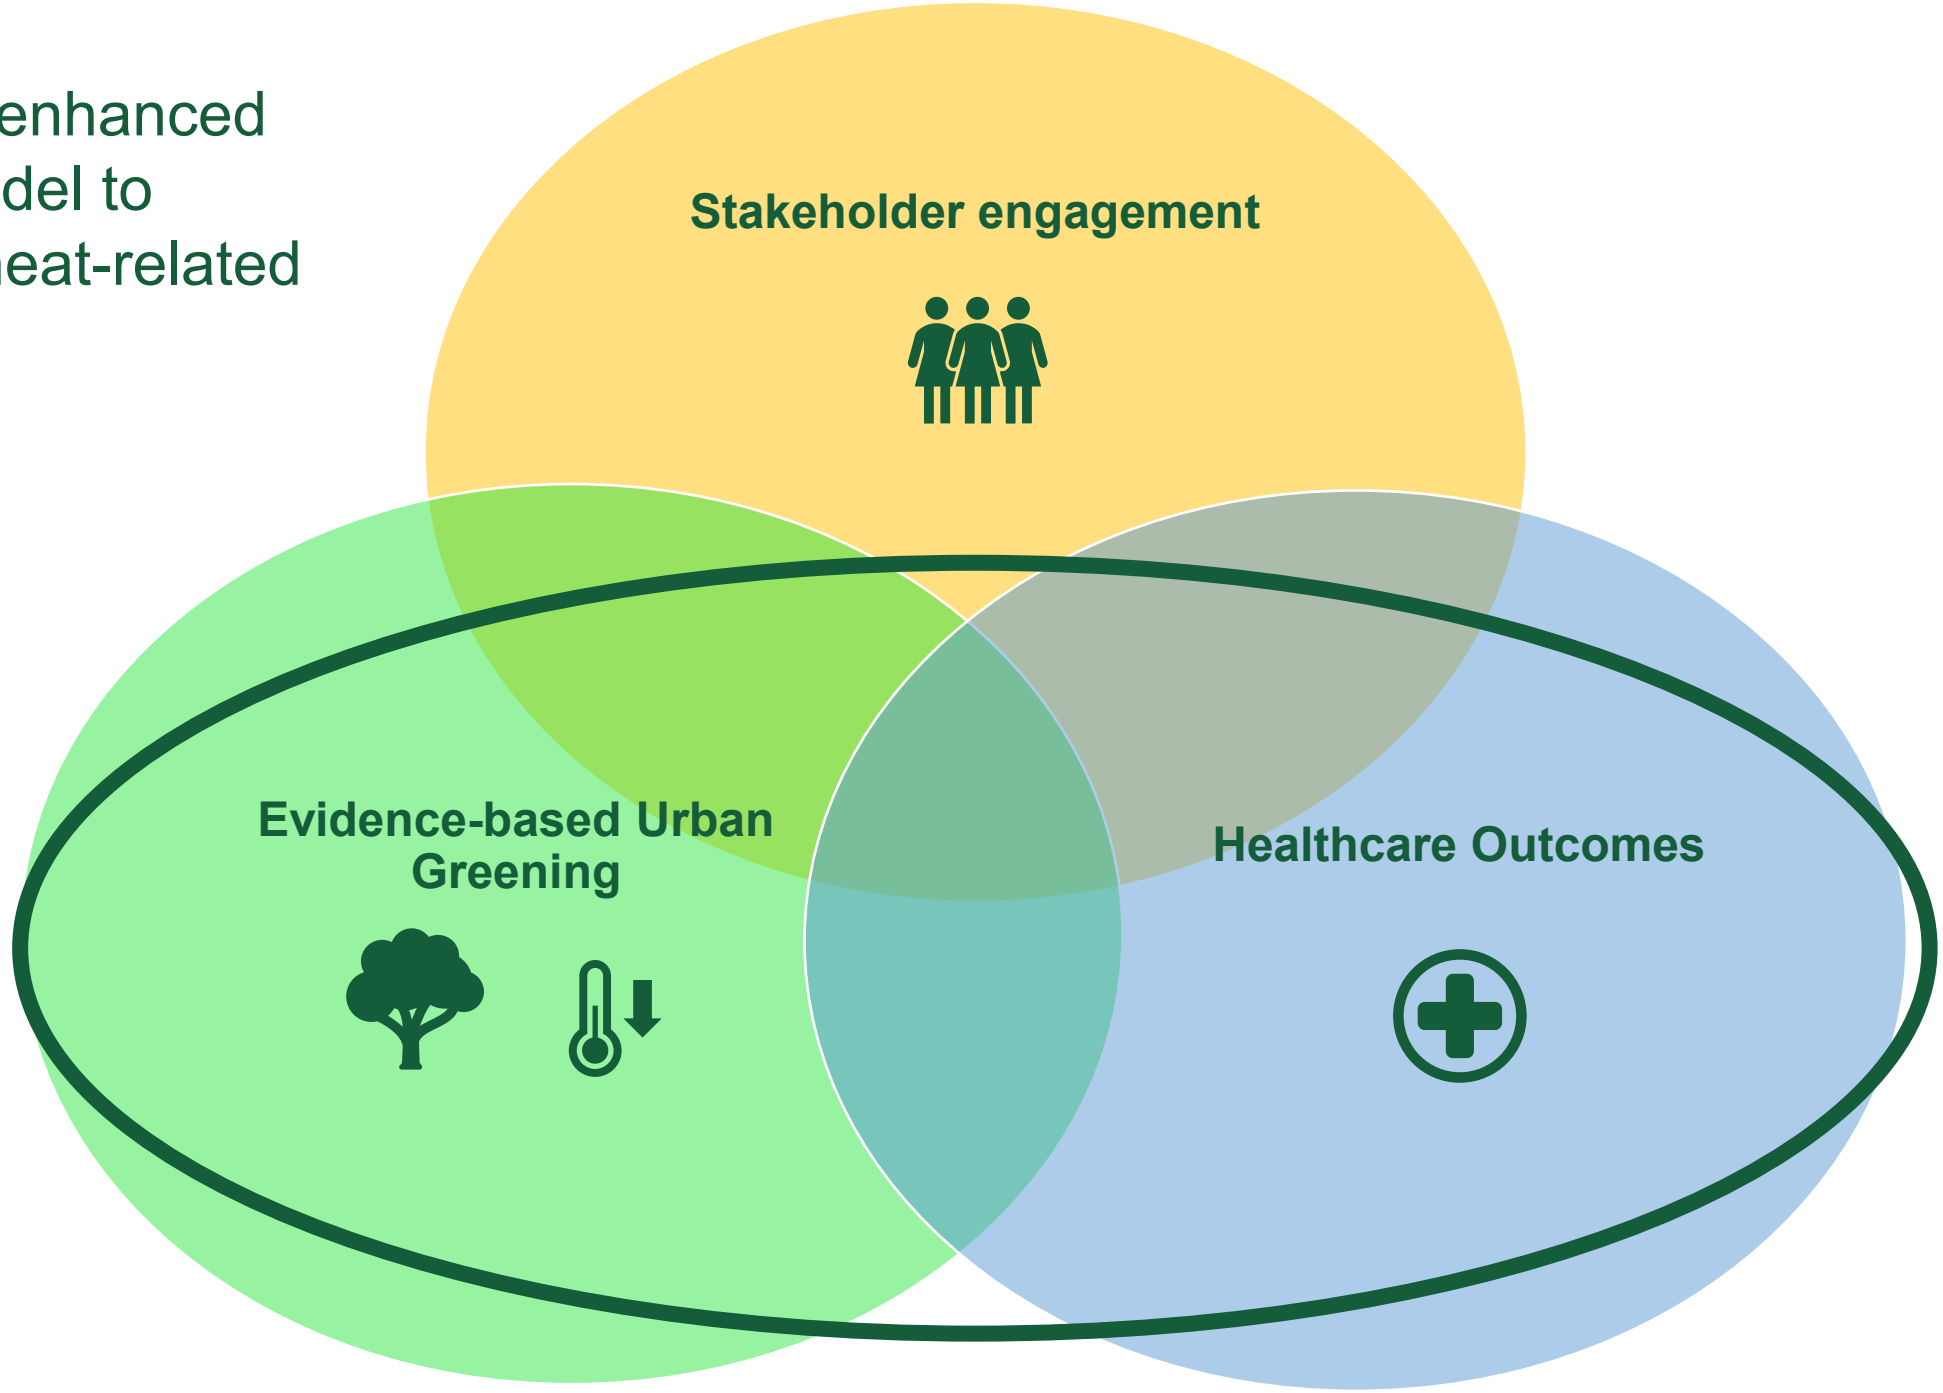

Heat waves are increasing in frequency, duration, and intensity

NASA Finds Summer 2024 Hottest to Date

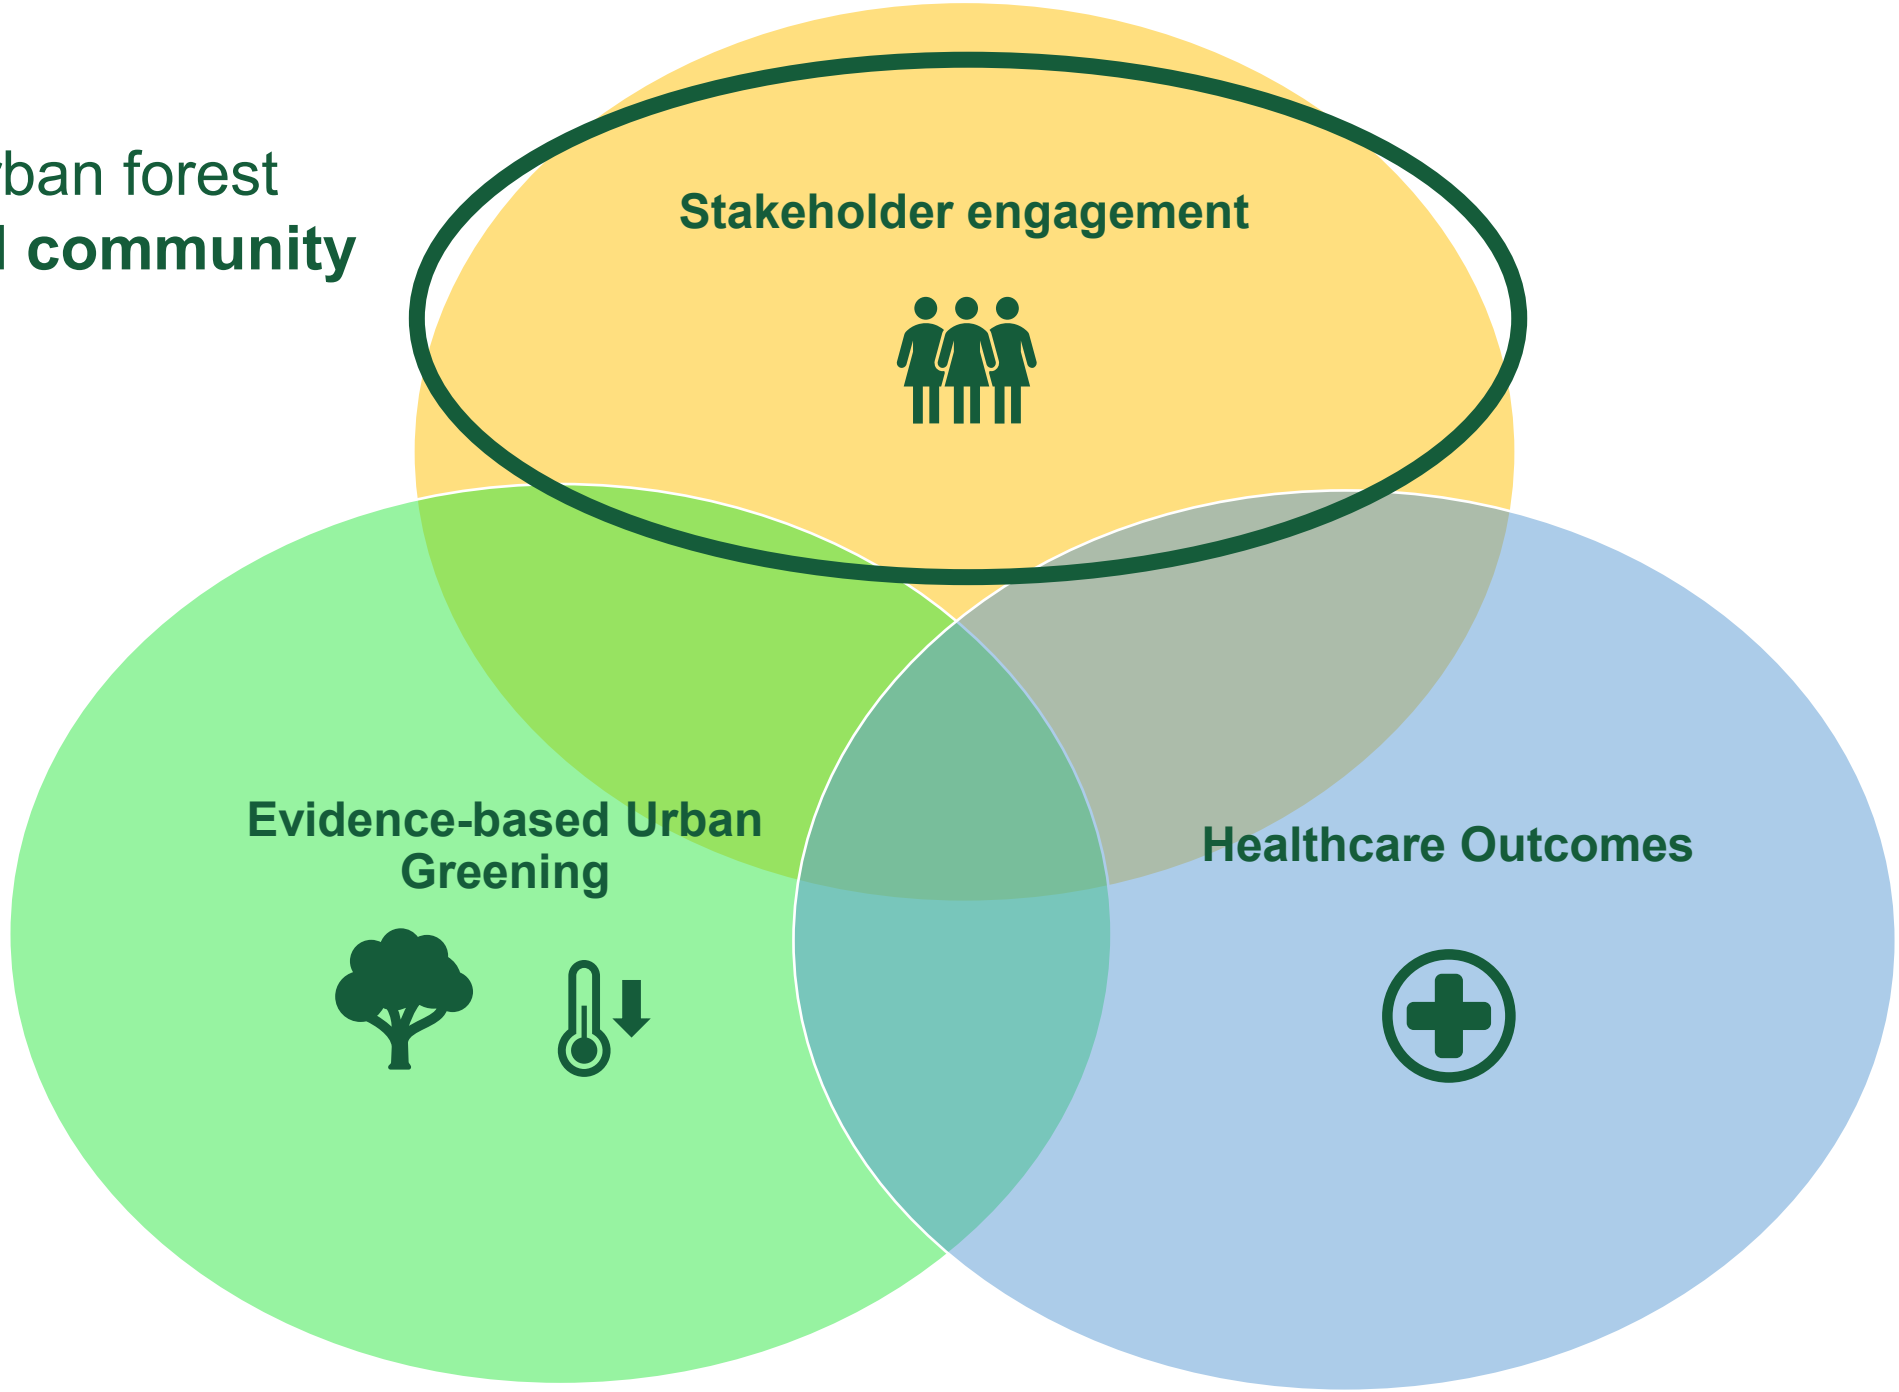

Our project: tree-enhanced urban climate model to reduce adverse heat-related health issues

Interviews with urban forest professionals and **community leaders**

Overview of interviews

6 community co-creation meetings

34 urban forestry interviews

17 community interviews (ongoing)
