

5.3 WIND SHEAR AND TURBULENCE PROFILING WITH METEOROLOGICAL RADAR

William J. Martin* and Alan Shapiro
CAPS/CMRP/School of Meteorology, University of Oklahoma, Norman, Oklahoma

October 8, 2001

1 INTRODUCTION

this is the intro

2 THEORY

this is the math part

3 RESULTS

these are some results

4 SUMMARY

this is the summary

5 ACKNOWLEDGMENTS

This research was supported by the Coastal Meteorology Research Program (CMRP) under Grant N00014-96-1-1112 from the United States Department of Defense (Navy) and by the Center for the Analysis and Prediction of Storms (CAPS) under Grant ATM91-20009 from the National Science Foundation and by contract with the Williams Company.
