

**Howard University Program in Atmospheric Sciences (HUPAS)
Annual American Meteorological Society Conference
Colour of Weather Networking Reception**

Atmospheric Sciences at Howard University

The Atmospheric Sciences program at Howard University is entering its 19th year and has become the Nation's leader in the production of African American PhDs. Since 2006 it has produced 60% of all African American PhDs and 30% of the Latino PhDs in atmospheric sciences.

"Colour of Weather" Diversity Networking Reception

The Colour of Weather reception is an annual event developed by HU and co-sponsored by NCAS and the AMS to celebrate and promote diversity of representation in careers and fields of study contributing to the atmospheric sciences as well as increase access to mentors for students of color. 150+ participants attend the annual event, including AMS present and past presidents, federal agency program managers, private sector leaders, and academics.
